

Automated Migration

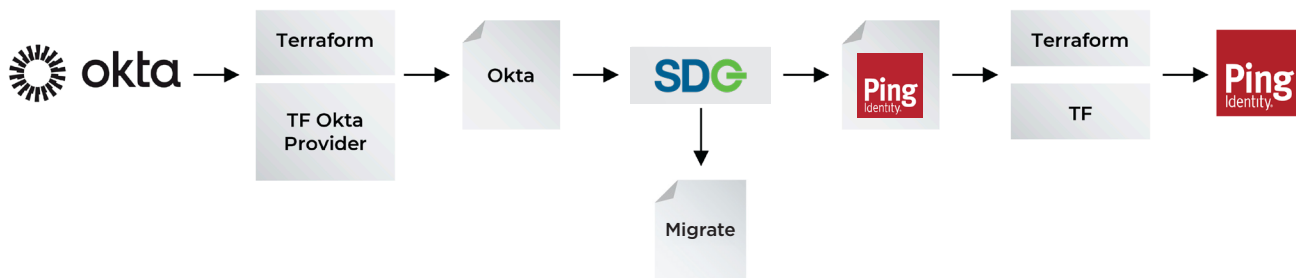

Hub City Media, now part of **SDG Corporation**, continues to deliver the same trusted identity migration expertise under the SDG brand — combining decades of experience with expanded capabilities to help enterprises modernize securely.

SDG CORPORATION'S ID TRANSFORMER

SDG Corporation's ID Transformer is a game-changing software appliance that allows you to transition from Okta or Auth0 to PingOne, slashing migration costs and accelerating time to value.

LEVERAGING AUTOMATION TO UNLEASH VALUE

Our migration service begins with a quick, automated assessment to determine the extent of bulk migration and identify necessary manual tasks. The assessment produces a detailed Migration Assessment Report, providing rapid insights for accurate project planning. Finally, the migration phase utilizes SDG's ID Transformer tool to automate the transfer of users and applications, translating the configurations into the PingOne environment.

- Fast Migration:** Rapidly convert to PingOne for review validation and final cutover, Move massive datasets with precision, minimize downtime and ensure smooth transitions - all while safeguarding data meeting compliance requirements.
- Non-intrusive Safe:** Migration is gentle on your existing platform, ensuring zero distribution or data loss, as it is a read-only Okta activity. Get detailed information for effort estimates, PoCs or even migrations without affecting your existing solution.
- Unlock Future Potential:** Create a blueprint of your existing IAM platform that enables worry-free enhancements and added functionality.
- User Data Migration Made Easy:** Leverage the power of advanced Ping DaVinci orchestration for on-demand password migration.
