TruOps

TruOps GRC Solution IT Risk and Compliance

Today, with technology so pervasive, any IT risk poses a direct threat to your brand. But managing multiple risk and compliance processes is inefficient and ineffective without automation. While managing enterprise risk is a culture and process problem, companies need automation to mitigate risk and anticipate problems early enough to take corrective action.

SDG's TruOps GRC Solution provides a simple-by-design framework that can be calibrated to your IT Risk and Compliance processes to provide business insight and smart governance.

Automates the entire risk **management** process, from scoring to mitigation and reporting

Features & Benefits

SIMPLE BY DESIGN FRAMEWORK
For fast implementation
